

YOU DON'T HAVE TO WORK IN A C-SUITE... TO SEE SWEET BUSINESS REBATES FROM PSO.

Whether you're a small business owner, facility manager or CEO, PSO has business rebates for you. We'll help you incorporate any of the following rebates.

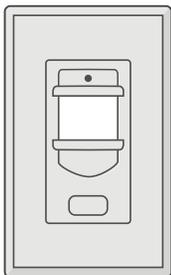

INTERIOR LIGHTING

Recommendation	Per Unit
LED Interior Fixtures Replacing outdated equipment with new, qualified LED lighting systems can be a fast and extremely efficient way to save energy and money.	\$20-60
High Bay Fixtures LED Replace outdated high bay fixtures with LEDs to reduce lighting costs while enjoying a longer-lasting, better quality of light.	\$80-325
High Performance Fluorescent Replace HID fixtures with energy-efficient, CEE-listed fixtures. Choose high-performance T8 or T5 linear fluorescent lamps and electronic ballasts.	\$30-70
LED Screw-In Lamps Replace existing incandescent and HID lamps with ENERGY STAR® listed LED lamps.	\$10
LED Exit Signs Replace your existing incandescent or fluorescent exit sign with a more efficient LED exit sign.	\$10

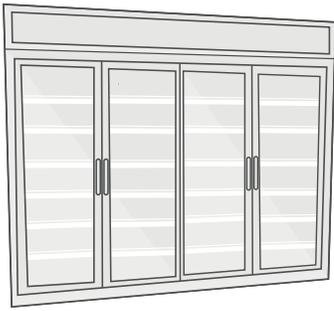

OUTDOOR LIGHTING

Recommendation	Per Unit
Parking Garage LED Fixtures Replace HID or fluorescent models with new LED fixtures.	\$75-100
Parking Lot LED Fixtures Install LED or gas canopy fixtures to replace HID or fluorescent models.	\$35-250
Flood and Wallpack Fixtures Install LED or gas canopy fixtures to replace HID or fluorescent models.	\$35-250
Traffic Signals Retrofit incandescent signal heads with LED lamps.	\$10-25

SENSORS AND CONTROLS

Recommendation	Per Unit
Occupancy Sensors for Lighting Wireless automation is an ideal way to improve efficiency and reduce costs without making significant capital investments. **Special promotional rebate amount, while supplies last.**	\$35-120
Vending Machine Controls Install occupancy-based vending machine controls to reduce energy waste and save money.	\$10-25
Smart Power Strips Install smart power strips and sensors. Plug office equipment into manual or automated power strips to reduce energy use when equipment is not in use.	\$5

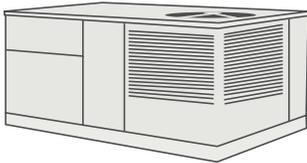

COOLERS & FREEZERS

Recommendation	Per Unit
Upgrade Refrigerators & Freezers Replace your current conventional reach-in refrigerators with high-efficiency ENERGY STAR refrigerators to reduce your energy costs and enhance your food storage.	\$20-300
Anti-Sweat Heat Controls Save energy and money by reducing the amount of time your anti-sweat heaters are running with an efficient automated system.	\$40/door
Reach-In Door Closers Reduce energy waste at low cost by installing automatic door closers to your reach-in coolers and freezers.	\$45-50
ECM Fan Motors Replace your inefficient fan motor with an electronically commutated motor (ECM) to dramatically reduce energy consumption over time.	\$5/motor
LED Strip Lighting Replace your current refrigerator lighting with ENERGY STAR LED strips to reduce lighting, cooling and maintenance costs without compromising lighting quality.	\$20
Add Strip Curtains Strip curtains are a low-cost and high-quality solution to keep the cold air in and the warm air out of walk-in cooler and freezer units.	\$5/sq ft

FOOD PREPARATION

Recommendation	Per Unit
Ice Machines Replace your current ice machines with super-efficient ice machines to reduce your energy costs, save water and ensure you have enough ice to meet peak demands.	\$40-350
Electric Food Prep Equipment Replace your current electric food prep equipment with high-efficiency equipment to reduce your ongoing operating costs.	\$115-1,000

HVAC

Recommendation	Per Unit
New Unitary HVAC Units Replace old air conditioners with high-efficiency units and achieve significant energy and operational savings while improving comfort levels.	\$150/ton
Variable Frequency Drives for HVAC Reduce energy waste by installing a variable-speed motor that allows equipment to respond more precisely to load requirements by adjusting fan speeds when needed.	\$45-75/hp
Hotel Room HVAC Controls Hotel HVAC controls allow selected rooms to use less energy during periods when the spaces are unoccupied.	\$25

At PSO, we know every business is unique. So we provide custom rebates designed for your specific needs. To help you get started, PSO offers business energy audits including ASHRAE levels I, II & III.

Design assistance is available for new facilities, and retro-commissioning can improve the performance of existing structures. Our experts can even help with benchmarking, feasibility studies and energy master planning. We'll help you squeeze every ounce of efficiency out of your equipment and facilities.

Get down to business at PowerForwardWithPSO.com. Or call **888.776.1366** to talk to our rebate consultants.
